## **RESIN REMOVER:** **PRODUCT DATA SHEET**

### **Description:**

A pale, low viscosity cleaner containing environmentally friendly raw materials, which replace the traditional highly, flammable petroleum based solvents. Designed to remove a variety of mastics from floors, walls, machinery and printing equipment including rollers. Less aggressive towards sensitive plastics and slower in evaporation rate, makes this product far more economical in long term use than the more conventional grades of mastic remover.

- Very low aromatic content
- Easily removes mastics, ink and paint
- Does not contain petroleum solvents
- Pleasant to use
- High flash point
- Slow evaporation rate – low VOC
- Not classified as hazardous
- Low toxicity

### **Application**

General Cleaning: Use neat via brush or swab, allow up to 5 minutes contact time. Then wipe clean. Repeat if necessary.

Dip Tank: Place components in wire basket, soak in fluid for up to 5 minutes. Remove, drain and wipe dry or use compressed air.

ALWAYS TEST ON SMALL AREA FIRST

### **Packaged**

Available in 5, 25, 30 and 205 litre metal containers
